

José María Soler

Discover the treasures of Villena

The Museum of Villena was designed as a journey through time that allows us to learn about all the cultures and civilisations that have inhabited this territory, dating back to the most ancient times in history.

The origin of this heritage, of extraordinary value, is the result of the combination of the collections of the former "José María Soler" Archaeological Museum and the "Jerónimo Ferriz" Ethnographic Museum, enriched by the contributions of hundreds of people and researchers who have expanded this legacy.

This valuable heritage is exhibited in the historic Electro Harinera Villenense, built in 1909 and now restored for use as a museum.
